ANTEZ

<https://www.antez.org/>

Beatrice Bukantyte and Antez bring together their distinct diverse approaches to music, sound and listening. We want to find a singular identity, a substrate imbued with our emotional heritage, crossing the light of Baltic horizons with the colors of Andalusian lands. Our music is a polyrhythmic exploration of percussion and the timbre of traditional Lithuanian voices, folk instruments and objects.

Antez brings his drums - a medium through which he explores visions of the instant, the suspended fires of duende, and the telluric accents of aksak. Through her voice Beatrice explores the landscapes of memories and imagination. Variegating elements of folk or original tunes unfold, weave and disappear leaving instantaneous impressions.

This collaboration is a continuous search for a kind of language which embraces the space between structure and improvisation.

Text: Beatrice Bukantyte / Antez
